

cocoon

Take one – action.
In Cocoon cinema fans and aesthetes alike get their money's worth. Behind the large flap of this versatile piece of media furniture almost infinite storage space for hiding the complete home cinema system. Convenient: For cabling, simply remove the magnetically attached top glass overlays.

Made in Germany.

■ SPECTRAL

Cocoon System

Cocoon

Cocoon is a system furniture for individual lowboards, with flap or drawer and lots of storage space for your technology.

The system consists of a few elements that can be lined up. Cocoon is therefore particularly easy to plan.

With drawers or flaps, Cocoon is suitable for all living areas. With its high flexibility, sensible options and customization, Cocoon can fulfill many individual wishes and integrate almost all technical components.

Like all Spectral furniture, Cocoon is manufactured in Pleidelsheim in southern Germany.

Design

The design is determined by the angled flap construction with recessed handle. This gives Cocoon its unique character.

System & grid

Different variants with drawers or flaps for lining up.

Width: 66,8 cm, 131,0 cm

Height: 38,5 cm

Depth: 53,9 cm

Tailor-made options

Each element is individually shortenable in width. Height and depth are expandable, rather than reduceable. See also section Tailor-made options.

Cabinet

Solid construction with 16 mm wall thickness and 8 mm back wall, doweled and glued, for maximum stability. The cabinet surface Sand is black fine-textured, exceptionally robust and easy to clean.

Shelves

Glass shelves made of safety glass are included. For CO2 and CO3 the glass shelves are 6 mm thick, for CO5 8 mm thick.

Top plates

Glass top plates and side panels are included in the basic price. For combinations, a continuous top plate up to 350 cm wide is available.

Mechanics & function

Pull mechanism with integrated handle strip. Drawer mechanism with soft-close and flap dampers of the highest quality.

Installation types

Wall mounting, black Edge foot or polished stainless steel support are included in the basic price. All feet can be painted in desired colour from the NCS or Sikkens 5051 range.

Room divider

Cocoon can also be placed freely in the room. In this case, the glass surface is also mounted on the back. The rear side is fully clad on each element.

TV integration

TVs can be elegantly integrated with the rotating TV mount. The cable is routed invisibly in the column. There are two TV adapters to choose from: VESA adapter (for TV with VESA standard up to 400 x 400 mm) and Universal TV adapter, with which any TV can be mounted. Alternatively, TVs with feet can be placed on the top plate, the cable routing is then can be done with a cable opening in the cabinet. With a TV wall mount from Spectral, the TV can also be mounted on the wall, in this case, an on-site cable routing in the wall is recommended.

Sound integration

Cocoon offers two variants for sound integration. In both variants, the flap is covered with acoustic fabric, which allows the sound to escape unhindered.

Soundbar integration. Soundbar or subwoofer can be placed behind the fabric flap. **Spectral sound system integration.** Behind the fabric flap there is a receptacle for the Spectral loudspeaker systems and other technical components.

Lighting

Indirect LED lighting on the rear edge of the furniture. The LED strips can be individually planned at the top and the sides. The LED lighting is dimmable and can be operated by remote control or app. The light colour is warm white (3200 Kelvin).

Wireless Charging

All current smartphones with Qi standard can be charged wirelessly with Smart Charge. The charging element is invisibly integrated under the surface. A discreet marking shows the area on which charging is possible.

Cable management

For wiring, simply remove the magnetically attached glass top plates. Lined-up cabinets are connected with a cable aperture, so that cabling between the elements is possible without any problems. In this way, technical elements can also be integrated in different cabinets. Cable outlets in the cabinet base are available as an option.

Surfaces

Colour glass. Colour glass consists of a 4 mm safety glass plate. The paint finish is applied to the underside. The glass surface is very hard, scratch resistant and easy to clean. There are 5 base colours to choose from as well as over 2,000 custom colours. These can be selected from the NCS or Sikkens 5051 colour chart (most RAL colours on request). The glass surface can be ordered in glossy or satin (matt).

Metallic glass. Metallic glass has the same properties as colour glass and is available in 6 chic metallic colours. The glass surface can be selected glossy or satin (matt).

Acoustic fabric flaps. Flaps can also be selected with acoustic fabric.

1.1 Lowboards with storage

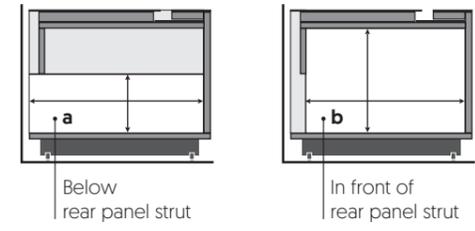

Cocoon Lowboards are delivered including the side glasses. If several elements are connected, the position of the side glasses must be specified [L for left, R for right, LR for left and right].

Options such as TV mount, subwoofer opening or LED lighting see section 4 and 5. Optional flap (standard) or drawer (surcharge). Elements with drawer or inner drawer or pull-out shelf must be mounted to the wall (mounting kit is supplied).

		Optional accessories	ADX02	Universal soundbar tray	

The universal soundbar tray is suitable for all Sonos soundbars and many other brands. With this tray, the soundbar can be optimally adjusted in height.

1.3 Lowboard for Spectral sound system

Cocoon lowboard with fabric flap to accommodate the Spectral sound system SCA3 or BRA3 or the Spectral loudspeaker BRP1 and other technical components.
 A mounting frame is required to accommodate the sound system or the loudspeaker.
 An amplifier is required for the passive speaker BRP1. We recommend using a Sonos Amp.
 For prices and technical data on sound systems and speakers, see chapter sound systems.

Options such as TV mount, subwoofer opening or LED lighting see section 4 and 5.

Note on glass surfaces:
Glass is a product made from natural raw materials and is subject to variations in production technology. Depending on the inherent colour of the glass, glass thickness and lighting conditions, there may be colour differences between different glass surfaces.
Likewise, there may be deviations between glass samples in the specialized trade and the finished furniture. In the case of subsequent deliveries of glass surfaces, production- and batch-dependent colour differences are possible and do not constitute grounds for complaint.

Note on fabrics:
Fabrics are subject to production variations. Therefore, there may be colour differences between different fabric-related components. Likewise, there may be deviations between fabric samples in the specialist trade and the finished furniture. In the case of subsequent deliveries of fabric-related components, production- and batch-dependent colour differences are possible and do not constitute grounds for complaint.
