Lowboard
ARE600 / ARE1200

Lowboard
ARE2000

Benötigtes Werkzeug / Required tools

D

Mäßiges Anziehen von Hand genügt, keine Gewalt anwenden!

Nicht mit scheuernden Mitteln reinigen!

Wandmontage vom Fachmann überprüfen oder durchführen lassen! Das mittelgelieferte Befestigungsmaterial ist für Wände aus Mauerwerk oder Beton vorgesehen. Da es verschiedene Wandmaterialien gibt, ist im Einzelfall vom Kunden zu überprüfen, welche Schrauben und Dübel für die sichere Befestigung geeignet sind. Die Beschaffenheit der Wand ist hinsichtlich Tragfähigkeit und Eignung genau zu überprüfen.

Wir übernehmen keine Gewähr/Haftung für den Aufbau bzw. die Montage.

Konstruktionsänderungen vorbehalten.

Bitte beachten Sie beim Betrieb von Geräten in Elementen mit geschlossener, luftundurchlässiger Front die Herstellerhinweise Ihrer Audio- und Videokomponenten bezüglich Belüftung. Eventuell muss bei Geräten mit starker Hitzeentwicklung die Front während des Betriebs geöffnet sein, um einen Hitzestau zu vermeiden.

F

Vissage uniquement manuel. Un serrage excessif peut endommager la plaque de verre et les éléments.

Ne pas utiliser de matière abrasive ou chimique qui pourrait détériorer la surface.

Le montage au mur doit être réalisé et/ou vérifié par un professionnel de l'installation afin d'éviter tout incident ou dégâts. Les matériaux d'installation joints sont destinés à être montés sur des murs en brique ou en béton. Selon la nature du mur, choisissez le type de vis et fixations appropriées pour garantir un montage en toute sécurité. Vérifiez avec soin la résistance et l'aptitude du mur à soutenir une charge.

Nous ne pouvons être tenu responsable pour des défauts ou des dégâts causés par un assemblage ou un montage non conforme.

Nous nous réservons le droit d'apporter des modifications techniques.

Lors de l'utilisation d'appareils dans des éléments dont la façade est fermée et ne laisse pas passer l'air, observez les instructions du fabricant des composants audio et vidéo en matière de ventilation. Il peut être éventuellement nécessaire d'ouvrir la façade pendant le fonctionnement des appareils qui dégagent beaucoup de chaleur afin d'éviter toute surchauffe.

TR

Sadece elle sıkıştırınız. Aşırı sıkıştırma hem cama hem de düzeneğe zara verebilir.

Lütfen yüzeye zarar verebilecek olan aşındırıcı maddeler veya kimyasal maddeler kullanmayınız.

Kaza veya yaralanmadan kaçınmak için duvar montajını yetkili bir kurulumcu ile yapılması veya sonunda kontrol edilmesi gereklidir. Duvar malzemeleri değişebileceğinden dolayı lütfen uygun vidaları ve sabitleme vidalarını emniyetli ve güvenli montaj için seçiniz ve kullanınız.

Lütfen yanlış bir araya getirme ve/veya montaj yüzünden meydana gelen hatalar veya hasarlar için sorumluluk kabul etmeyeceğimize dikkat ediniz.

Cihazları kapalı, hava geçirmez ön cepheye sahip elemanlarda çalışırken, ses ve video bileşenleri üreticilerinizin havalandırma ile ilgili uyarılarını lütfen dikkate alın. Gerektiğinde, yoğun ısı oluşumu cihazlarda ısı birikiminin önlenmesi için ön çalıştırma esnasında cephe açık tutulmalıdır.

GB

Tighten only by hand. Over tightening may cause damage to both glass and fittings.

Please do not use abrasive materials or chemicals, which may cause damage to the surface.

It is essential that wall-mounting is carried out or finally inspected by a competent installer, to avoid accident or injury. The fastening material provided is intended for installation on walls made of bricks or concrete. As wall materials vary, please select and use suitable screws and fixings to achieve safe and secure mounting. Check the wall structure thoroughly to ensure its carrying capacity and suitability will support the total load.

Please note that we cannot accept responsibility for faults or damage caused by wrong assembly and/or mounting.

Subject to design change.

Please note the manufacturer's instructions on ventilation for your audio and video equipment when operating devices in elements with a closed, airtight front. It may be necessary to leave the front open during operation to prevent internal heat accumulation for devices that generate excessive heat.

NL

Alleen handmatig strak aandraaien. Te strak aandraaien kan schade aanbrengen aan zowel het glas als de hechtings-plaats.

Gebruik s.v.p. geen materiaal dat kan schuren of chemische producten aanbrengen op de schade kan aanbrengen.

Het is noodzakelijk dat de muurbevestiging goed gebeurt of desnoods door een competent installateur wordt geregeld, zodat schade of ongelukken en letsel voorkomen worden. Bijgeleverde bevestigingsmaterialen zijn bestemd voor montage aan wanden van baksteen of beton. Aangezien iedere muur van structuur verschilt, is het belangrijk dat de juiste schroeven worden gebruikt om zo een veilige muurbevestiging te garanderen.

De fabrikant kan geen verantwoordelijkheid nemen voor schade ontstaan door verkeerde montage of ophanging.

Onderhevig aan verandering.

Bij het gebruik van apparaten in elementen met gesloten, luchtdichte front volgt u de instructies van de fabrikant van uw audio- en videocomponenten op wat betreft de ventilatie. Eventueel moet bij apparaten met een sterke warmteontwikkeling het front tijdens het gebruik geopend zijn om een warmteophoping te vermijden.

P

Aperte manualmente os parafusos. Um aperto excessivo poderá danificar tanto o vidro como as junções.

Não utilizar produtos abrasivos ou químicos, pois estes poderão danificar as superfícies.

É essencial que os suportes de parede sejam montados e verificados por um instalador qualificado, de modo a se evitarem quaisquer acidentes. Os materiais de instalação juntos são fornecidos para uma montagem em paredes de tijolo ou de betão. Conforme o tipo de parede, use o tipo de parafuso indicado para esta, de modo a se obter uma fixação perfeita e segura.

Não poderemos aceitar quaisquer responsabilidades de acidentes inerentes a erros de montagem ou instalação deficiente.

Sujeito a alterações.

Durante a operação de aparelho em elementos com a frente fechada, impermeável ao ar, tenha em atenção as indicações do fabricante dos seus componentes áudio e vídeo relativamente à ventilação. Eventualmente em aparelhos com um intenso desenvolvimento de calor, a frente deverá estar aberta durante o funcionamento para evitar uma acumulação de calor.

E

Ajustar solo con las manos. Un ajuste excesivo puede causar daños tanto al cristal como a las fijaciones.

Por favor no usar materiales abrasivos químicos, que puedan causar daños a la superficie.

Es importante que el montaje a la pared lo lleve a cabo o lo inspeccione un instalador competente para evitar accidentes o daños. Los materiales de instalación incluidos se proporcionan para el montaje en murales de ladrillo u hormigón. Como los materiales de la pared pueden cambiar, por favor, seleccionar los tornillos adecuados para conseguir una fijación segura.

Por favor, se consciente que nosotros no podemos aceptar responsabilidad por faltas causadas por un mal montaje o ensamblado.

Salvo modificación.

Tenga en cuenta las recomendaciones del fabricante en cuanto a la ventilación para aparatos de audio y componentes de vídeo con un panel frontal cerrado o hermético. Puede que en algunos aparatos con calor excesivo sea necesario abrir el panel frontal durante el funcionamiento para evitar un sobrecalentamiento.

RUS

Затягивайте вручную. Излишние усилия при затяжке могут привести к повреждению стекла и фурнитуры.

Не используйте абразивные материалы или химикаты, это может привести к повреждению поверхности.

Настенный крепеж должен быть проведен и проверен компетентными установщиками. приложенные материалы для крепежа подходят только для стен каменной или кирпичной кладки или стен из бетона. Поскольку материалы стен различны, внимательно подберите соответствующие болты для безопасной и надежной фиксации. структура и строение стены должны быть проверены на устойчивость и пригодность.

Обращаем Ваше внимание что мы не несем ответственности за разрушения и повреждения, вызванные неправильной сборкой и монтажом.

Возможны изменения.

При эксплуатации устройств с закрытой, воздуонепроницаемой передней панелью необходимо соблюдать указания производителя аудио- и видеоборудования относительно вентиляции. Чтобы предотвратить накопление тепла, для устройств с большим тепловыделением может потребоваться оставить открытой переднюю панель во время работы.

I

Serrare solo a mano. Un serraggio eccessivo può causare rottura dei cristalli e di altre componenti.

Attenzione non usare materiali abrasivi o chimici poiché potrebbero danneggiare la superficie.

E' essenziale che i supporti a muro siano installati o ispezionati da un installatore competente per scongiurare danni a persone o cose causati da una scorretta installazione. I materiali per l'installazione forniti sono da intendersi per il montaggio su muri in mattoni o cemento. Poiché i tipi di muratura possono essere i più diversi, è opportuno scegliere e utilizzare le viti e i fissaggi più adatti alla muratura a disposizione. Verificare con precisione la qualità della parete in termini di portata e idoneità.

Attenzione! Nessuna responsabilità potrà esserci attribuita per problemi causati da una scorretta installazione o assemblaggio.

Con riserva di modifiche.

Durante il funzionamento dei dispositivi in elementi con parete anteriore chiusa e che impedisce il passaggio d'aria bisogna rispettare le indicazioni del produttore dei componenti audio e video in relazione alla ventilazione. Eventualmente, con i dispositivi con forte sviluppo di calore bisogna aprire la parete anteriore per evitare un accumulo di calore.
