spectral tv-stand
art AX
art AX

Like a painting. What a contrast: Premium OLED technology above, solid oak below – fits perfectly. The elegant, passionate design of the easel ensures the perfect staging of the TV screen. The plugs and connection cables are hidden out of sight, covered by the back board and passed through the inside of the base. This is your cinema.

Live and in colour. The Art AX consists of a tripod made of solid oak and is available in three colours: Oak Nature, Oak Grey and Oak Black.
Artfully staged.
The Frame TV model from Samsung is a real eye-catcher even when it is switched off and harmonises perfectly with the easel look of the Art AX.
Solid oak of the highest manufacturing quality

The feet of the elegant tripod are made from a single piece of wood and convey the premium quality of the TV stand. The solid wood is either available in the natural oak colour or can be ordered in black or gray colour. The high manufacturing quality not only ensures stability and safety, but also a total load capacity of a full 40 kg.

Clever cable management with a magnetic cover

All power and connection cables can be conveniently hidden in the rear of the Art AX TV stand. The cables are always tidy and perfectly protected from dust and damage. A magnetic cover makes it quick and easy to access at any time. Two integrated metal profiles also help to accommodate the cables.

Integrated cable outlet in the rear stand

The Art AX TV stand has a discreet cutout on the back of the rear for connection to the nearest power socket. This also makes it easy to connect additional external devices. The size of the cable outlet enables up to four cables to be fed through at the same time.
art AX in detail

Including TV bracket with an universal adapter

Televisions with a screen diagonal of 48” to 65” harmonise perfectly with the Art AX. The supplied TV bracket with universal adapter is suitable for almost all standard TV sets with VESA mount of 100 x 100 to 600 x 400. The exact height of the television on the TV stand can be altered individually when using the universal TV adapter.

Adapters for different soundbar models

For those who want to expand the sound of the TV with a soundbar, there are different soundbar adapters available for perfect connection. The B&O Beosound Stage, the Sonos Arc or Sonos Beam, various Bose models, and soundbar models from other manufacturers can be attached with the appropriate adapter.

Media mount as an on-the-shelf solution

The Art AX allows various media players and hard-disks to ride piggyback. With the optional media mount, you can cleverly install Apple TV and Co. behind the TV on the back board. Also the One Connect Box of the Samsung Frame TV can be attached this way.

*Wood is a natural product with differences in colour and structure

Every tree is different due to its individual life story. It is therefore an essential feature and an unmistakable sign of authenticity of natural woods that slight colour differences and structural features of grain will occur in the production of the finished product. These factors make every Spectral Art AX TV stand unique.
