

side

More space in the room.

Storage space doesn't sound sexy. Until you stand in front of Side. Our sideboards and highboards are practical, timeless and versatile. But above all, they are smart eye-catchers – and the perfect complement to Spectral's media lowboards.

Made in Germany.

Side System

Side

Side is a system furniture for individual lowboards, sideboards and highboards.

The system consists of numerous elements that can be lined up and stacked. The logical grid of 25 or 50 cm steps allows easy planning. The range offers a high variety of interchangeable surfaces.

With doors, drawers or flaps, Side is suitable for all living areas. With its high surface variety, useful options and made-to-measure Side can fulfill many individual wishes. The possibilities are virtually unlimited.

Thanks to its timeless and puristic design, Side is the perfect complement to Spectral's media lowboards. Like all Spectral furniture, Side is manufactured in Pleidelsheim in southern Germany.

Design

Side is available in two different design variants.

Model 1. Model 1 is timeless. The overflowing top plate forms the classic design.

Model 1 is available in all finishes. Model 1 elements can be stacked.

Model 2. Model 2 is modern. The overflowing fronts and sides offer a modern design concept. Model 2 is available in colour glass, metallic glass, design glass and Fenix®.

System & grid

Different variants with doors, drawers or flaps, in combinations, ready for lining up and stacking. Display cabinet doors are available from a height of 75 cm. Continuous top panels or side panels are available for combinations.

Width grid: 50 cm, 100 cm, 150 cm

Height grid: 50 cm, 75 cm, 100 cm, 125 cm

Depth grid: 38 cm, 48 cm

Tailor-made options

Each element can be individually shortened in width and depth.

Cabinet

Solid construction with 19mm wall thickness and 8mm back panel, doweled and glued, for maximum stability. The cabinet surface Sand is finely textured, exceptionally robust and easy to clean. 5 cabinet colours are available: snow, grey, pebble, granite and black.

Shelves

Sturdy 19mm shelves in cabinet colour, height adjustable and included in delivery. Additional shelves can be ordered.

Top plates

Top plates are included with each element. A continuous top plate can be selected for several elements. Depending on the surface, there are different maximum widths. Smart varnish and veneer up to 275 cm. Colour glass, metallic glass and design glass up to 350 cm. Fenix® and ceramic up to 300 cm.

Mechanics & function

Damped hinges, soft-close drawer mechanism, flap dampers and push-to-open mechanism of the highest quality. For wall hanging elements with a door, the position of the push-to-open fitting can be selected.

Installation types

Standard: Base pedestal plate, wall mounting, Edge foot or Stick foot are included in the basic price.

Foot frames: Bridge, Blade and Frame are available at additional cost.

Base colour for foot frames and Edge feet is black. Base colour for Stick foot is black and brushed aluminum.

All feet and foot frames can be painted in desired colour.

Room divider

Side can also be placed freely in the room. In this case, a surface panel can also be mounted on the back. The rear side is then fully clad.

Room divider is possible for elements with depth 48 cm and maximum height 75 cm.

Lighting

Indirect LED lighting on the rear edge of the furniture. With dimming function and adjustable light color from cold white to warm white, approx. 2500 – 6500 Kelvin. The LED strips can be individually planned at the top, bottom and sides.

Open elements can also be illuminated on the inside.

The LED lighting can be operated by remote control or optionally by smart home via Zigbee 3.0 [Zigbee hub required].

Cable management

A cable opening can be selected at the rear edge of the top plate, the opening is elegantly concealed with a brush finish. In addition, a cable opening can be selected within the cabinet or in the rear panel.

Surfaces

Model 1 is available in smart varnish, colour glass, metallic glass, veneer and Fenix®.

Model 2 is available in colour glass, metallic glass and Fenix®.

Top plates for model 1 and model 2 are also available in design glass and ceramic.

Smart varnish. Smart varnish is a particularly high-quality paint finish. It consists of several layers. The top coat is a soft-touch surface and has an anti-fingerprint effect. Smart varnish is more scratch resistant and lightfast than conventional paints. The edges are applied separately using a laser process and are shock-resistant.

Colour glass. Colour glass consists of a 4 mm safety glass plate. The paint finish is applied to the underside. The glass surface is very hard, scratch resistant and easy to clean. There are 5 base colours to choose from as well as over 2,000 custom colours. This can be selected from the NCS or Sikkens 5051 colour chart (most RAL colours are available on request). The glass surface can be selected in gloss or satin (matt).

Metallic glass. Metallic glass has the same properties as colour glass and is available in 6 chic metallic colours. The glass surface can be selected gloss or satin (matt).

Design glass. Design glass consists of a 4 mm safety glass plate. A high-resolution digital print is applied to the underside. The surface is brilliant and visually indistinguishable from a natural motif. Design glass is very hard, scratch resistant and easy to clean. Design glass is only 4 mm thin and therefore appears light and elegant. The glass surface can be chosen glossy or satin (matt). Satinized glass renders the motif blurred, but thus appears discreet and restrained.

Design glass is only available for top plates.

Veneer. Our veneers are made of real wood. The surface is brushed and sealed with a matt natural wood varnish. This makes the wood surfaces easy to clean and hard wearing. There are 6 wood tones to choose from. The veneer direction can be selected vertically or horizontally.

Fenix®. Fenix® is an extremely matt nanotech material, the surface is particularly regal and has a velvety touch. It is also resistant to fingerprints. We process Fenix® in the elegant 4 mm thickness. This allows for a particularly light and intricate design. Fenix® is available in 6 harmonious colours.

Dekton® ceramic. Ceramic is our most durable surface. It is extremely abrasion, scratch and impact resistant. It is also resistant to heat and stains.

The ceramic plates are 8 mm thick and available in many regal, matt surfaces.

Ceramic is only available for top plates.

Price groups

The surfaces are divided into four price groups.

Price group 1: Smart varnish

Price group 2: Colour glass and metallic glass

Price group 3: Veneer, Fenix® and design glass

2. Tailor-made options

With Side you have options for customization. Tailor-made according to your ideas, custom carpentry for your home. Popular changes are in the table below.

* For dimensional changes and continuous top plate please use furnplan planning software. A separate request and written quotation is not required for this. For further options and information, please visit our website at www.spectral.eu/tailor-made or inquire directly with our customer service by e-mail at info@spectral.eu.

Type of change	Remarks
	The width of cabinet elements can be shortened to the next smaller size. Drawers require a minimum width of 32,0 cm. Depth is possible from 30,0 to 38,0 cm and 38,1 to 48,0 cm. Change in height possible only on request.
Dimensional change * [1 charge for all dimensional changes per combination]	For elements with colour glass, metallic glass, design glass and ceramic
Dimensional change * [1 charge for all dimensional changes per combination]	For elements with smart varnish, Fenix® or veneer
Dimensional change in height	On request
Move or change cable opening in top plate	
Special glass	For example: cable outlet at rear edge glass top plate
Change interior layout S	Small change, e.g. shorten center bar
Change interior layout L	Major change, such as customization or division

Note on real wood veneer:
Real wood veneers from different logs differ. Therefore, there can be no absolute colour and texture uniformity between different fronts, sides and top plates. Wood is a natural product and changes colour over time. Likewise, there can be deviations between wood samples in the specialized trade and the finished furniture. If a component is added to a piece of furniture later, there may be natural differences in colour and structure. These differences are a characteristic of real wood veneer and make your furniture unmistakably unique; they do not constitute grounds for complaint.

Note on glass surfaces:
Glass is a product made from natural raw materials and is subject to variations in production technology. Depending on the inherent colour of the glass, glass thickness and lighting conditions, there may be colour differences between different glass surfaces. Likewise, there may be deviations between glass samples in the specialized trade and the finished furniture. In the case of subsequent deliveries of glass surfaces, production- and batch-dependent colour differences are possible and do not constitute grounds for complaint.
